

## RESOURCES FOR: Supplemental Criteria

There are two supplemental criteria which are not required for Work Ready or Work Ready In Progress status. However, providing information about either or both of these measures may be considered by the review panel when determining status.

### **Occupation Credentials**

There are currently no data sources known which report these credentials by county. Several national organizations have called for such a data bank, but as of now none exists. If a community is interested in providing such data as a supplement, it is suggested that contact with organizations which issue occupational credentials (technical schools, community colleges, etc.) and/or employers and trade unions who recognize the credentials be engaged to provide any data they may have. All data must be sourced in your application and calculations shown.

Community surveys may also be another possible means of collecting such data, depending on how the data is collected and analyzed.

### **GED Attainment**

Applicants may supplement their data by demonstrating GED Attainment compared to the county's target for GED. Annual targets for each county can be found here: <http://www.kyae.ky.gov/performance/>
