

VALID INDUSTRY CERTIFICATIONS 2018-19

Industry Certification Process

KRS 158.6455 establishes the process used to determine which industry certifications are recommended for the list and the level of demand for certifications on the list.

In order to be considered “industry-recognized,” certifications must go through a verification process. The Kentucky Center for Education and Workforce Statistics (KCEWS) works with each local workforce investment board to give job and demand data for the region. Local workforce investment boards work with local economic development organizations and business to compile a list of industry-recognized certifications, licensures, and credentials, ranked by demand for that region. The lists are then given to the Kentucky Workforce Innovation Board (KWIB). Finally, the KWIB and KDE work together to edit and refine the list before KDE disseminates to all school districts. This work is done to ensure industry-recognized credentials are practical, relevant, and that they align with career pathways. The attached list is based on information provided by local workforce investment boards (WIBs), reviewed by multiple business and industry groups, presented to the Kentucky Workforce Innovation Board (KWIB) Business and Education Alignment Committee and approved by the KWIB.

Industry certifications identified as HIGH DEMAND by KWIB will receive 1.25 in the state accountability model under Transition Readiness versus 1.00 for all other certifications. Certifications determined to be HIGH DEMAND by KWIB are highlighted and noted in the spreadsheet below.
